

OUTLINE: *CIP Standards Overview Web-Based Course*

Opens with information about the need for vigilance regarding cyber-security threats.

On-screen Instructor reviews course content and reasons for course participation. Simulates a live classroom setting.

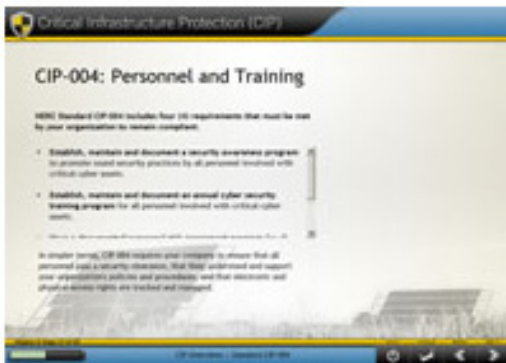

General Knowledge Checks throughout the course are interactive and reinforce presented content.

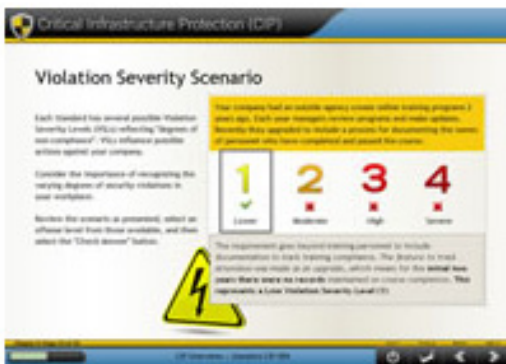

The Main Menu visually tracks progress through the course and is a helpful tool for time management.

An on-screen Instructor introduces each "Chapter" or CIP by presenting background information about the Standard.

The individual Requirements of each CIP are displayed, presenting the mandates points for compliance.

Violation Severity Levels are presented with an *interactive scenario challenge* to demonstrate possible real-life challenges to cyber security.

Displays Your Process, content and documents for compliance with each Standard. This page is the link to **Customize** the training with your site specific content.

A quiz on general information and company specific content reinforces knowledge and determines comprehension.

Successful quiz completion is required to continue and complete the course.

A Summary concludes each "Chapter" or CIP prior to returning to the Menu for the next topic.

The Road to Compliance follows completion of all CIP Chapters and emphasizes the need for employee collaboration in creating a safe electric power grid.

Upon completion, both score and status are reported to the Learning Management System. A Certificate of Completion may be printed.
